

openQA Tests - action #28657

[functional]Amarok rather frequently fails test

2017-11-30 14:35 - dimstar

| | | | |
|--|------------------------|------------------------|-------------------|
| Status: | Resolved | Start date: | 2017-11-30 |
| Priority: | Normal | Due date: | 2018-01-16 |
| Assignee: | zluo | % Done: | 0% |
| Category: | Bugs in existing tests | Estimated time: | 0.00 hour |
| Target version: | Milestone 12 | | |
| Difficulty: | | | |
| Description | | | |
| Observation | | | |
| openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-kde@USBboot_64 fails in amarok | | | |
| Reproducible | | | |
| Fails since (at least) Build 20171129 | | | |
| Expected result | | | |
| Last good: 20171127 (or more recent) | | | |
| Further details | | | |
| Always latest result in this scenario: latest | | | |
| This happens in random tests, usually a rerun of the test makes it pass. This needs to be debugged to find out if this is rather a product bug or a test that needs to be improved | | | |

- Related to action #25894: [sle][functional][opensuse]Mistyping in openQA again? - in kde added

#2 - 2017-12-01 22:16 - okurz

- Subject changed from Amarok rather frequently fails test to [functional]Amarok rather frequently fails test

- Due date set to 2017-12-19

- Target version set to Milestone 12

#3 - 2017-12-04 11:50 - nicksinger

Some information I found during review:

We assert the "sound has played" needle pretty quick after the playback is done. In some jobs the "recently played" list gets filled, in others not (as I said, maybe because we're too fast with asserting).

E.g. <https://openqa.opensuse.org/tests/546382#step/amarok/22> shows "withing the last minute" instead of "one minute ago".

In addition to that it is pretty unclear if a song is currently playing. The only indicator I could make out is this spectrogram (?) right at the bottom but there is no moving progress bar, no time-left-counter, nothing.

Besides that I could not really figure out what the "-l" parameter does which is hardcoded in this test - maybe its behavior changed over time.

take over

#6 - 2018-01-10 12:54 - zluo

check statistic and found that onyl 2 time failed.

So I won't say this is frequently...

https://openqa.opensuse.org/tests/546561?test=kde&distri=opensuse&limit_previous=400&arch=x86_64&flavor=DVD&machine=USBboot_64&version=Tumbleweed#previous

It was definitively much worse in the past - the KDE Team did disable a bunch of plugins that seemed to trigger it more frequently

#8 - 2018-01-11 09:21 - zluo

- Status changed from In Progress to Rejected

I don't see any issue according to recent re-runs of the test.

reject this for now.

Please open it if it happens again, thanks!

#9 - 2018-01-11 12:59 - okurz

- Status changed from Rejected to Resolved

Let's track it as "resolved" then when the accepted fix is the KDE team disabled plugins to stabilize behaviour.
