openSUSE Leap 15.0 - action #28815

compile a list of packages that are from sle but not maintained there

2017-12-04 14:48 - lnussel

Status:	Closed		**Start date:**	2018-03-07
Priority:	Normal		**Due date:**	2018-04-25
Assignee:	AndreasStieger		**% Done:**	100%
Category:	Release Engineering		**Estimated time:**	0.00 hour
Target version:	Polished			

Description
some packages are marked as coming from SLE even though not all or none of it's source packages are actually maintained there. Need to compute a list and discuss with maintenance.

Jimmy, could you help me with this please?

Basically we need a script that looks at all binary packages in Leap that come from SLE based source packages. List all source and binary packages that are not in any kiwi file in 000prodoct on SLE side (ie unwanted or unsorted).

#3 - 2018-03-15 16:33 - jberry

Rather than just source packages which may be in SLE and maintained there, but contain subpackages (binaries) that are not shipped need to look at binaries. Roughly translated:

```
for binary in binaries:
  if binary.origin = SLE and binary in unwanted:
    some_new_list.append(binary.name)
```

Where is the list to be placed?

Unsorted would appear to be a full package list? Ignore anything in 000product/unneeded.yml or 000package-groups/groups.yml#UNWANTED?

#4 - 2018-04-04 13:56 - lnussel

Sorry, I missed the question :-(

Dashboard or even just the output of a script that we can give to maintenance.

> Unsorted would appear to be a full package list? Ignore anything in 000product/unneeded.yml or 000package-groups/groups.yml#UNWANTED?

I think that is the input, yes. Looking at the output works too though as none of the generated kiwi files would contain the binaries.

#6 - 2018-04-13 22:47 - jberry

- Status changed from New to Feedback

https://github.com/openSUSE/openSUSE-release-tools/pull/1487

#7 - 2018-04-16 21:09 - jberry

full list

Also, 1489 should allow for easy usage by maintenance via:

```
zypper in openSUSE-release-tools
osrt-unmaintained openSUSE:Leap:15.0
```

#8 - 2018-04-18 02:03 - jberry

Verified the above works by installing in container.

#9 - 2018-04-20 22:51 - jberry

You noted that debuginfo binaries should be removed. There are also -debug- named packages and -debugsource. Is there a list of everything that should be excluded and/or who should I contact to review from maintenance?

#10 - 2018-04-23 15:56 - lnussel

I think we have filters for *-debuginfo and *-debugsource in other tools also

The contact would be Andreas Stieger

#11 - 2018-04-23 15:57 - lnussel

- Due date changed from 2018-04-13 to 2018-04-25

#12 - 2018-04-24 00:00 - jberry

Excluded debuginfo and debugsource in https://github.com/openSUSE/openSUSE-release-tools/pull/1503

updated full list

#13 - 2018-04-24 18:45 - jberry

- Assignee changed from jberry to AndreasStieger

- % Done changed from 0 to 100

Merged. Per lnussel comment, Andreas could you have a look?

```
# from openSUSE:Tools repo
zypper in openSUSE-release-tools
osrt-unmaintained openSUSE:Leap:15.0
```

updated full list

#14 - 2018-04-24 22:43 - jberry

discovered and resolved issue which effects this tool in pr#1505

updated list

#15 - 2018-04-24 22:48 - jberry

Disregard above link as I ran without rebasing on latest master so it includes debug packages.

updated list

#16 - 2018-05-01 15:03 - AndreasStieger

From Leap 42.3 maintenance experience, we can disregard discrepancies in subpackages being included or excluded. As long as the source container is maintained in SLE in some way or another then we will do maintenance updates for it, and thus inherit the code fixes for Leap.

#17 - 2018-05-07 16:36 - lnussel

So are you fine with the provided information Andreas, ie can the task be closed?

#18 - 2018-05-14 09:14 - lnussel

- Status changed from Feedback to Closed

so information was handed over, closing as done

#19 - 2018-09-05 15:36 - lnussel

I think sle-module-development-tools-obs-ftp-POOL-*.kiwi spoiled the list. The module actually does not map to channel so I think the content there is also unmaintained.
