Description

Observation

openQA test in scenario sle-12-SP3-Desktop-DVD-Updates-x86_64-qam-regression-gnome@64bit fails in [change_password](#)

Before this test was failing because of poo#26046. However now that, stopped happening the reboot is getting stuck in grub. It looks like some test changes are required.

Reproducible

Fails since (at least) Build [20170811-2](#)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History
