

## openQA Tests - action #30207

action # 19362 (Resolved): [userspace] split qa\_run.pm

### [userspace][kernel]Need to install more packages in install\_test\_suite.pm

2018-01-12 06:20 - yosun

<b>Status:</b>	Closed	<b>Start date:</b>	2018-01-12
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	yosun	<b>% Done:</b>	0%
<b>Category:</b>	Bugs in existing tests	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
The new merged test progress removed install qa_testset_automation, and some testsuites has some dependency with sub packages in it. I suggest to add a process to install qa_testset_automation/ctcs2/tools back in install_test_suite.pm			
<b>Observation</b>			
openQA test in scenario sle-15-Installer-DVD-ppc64le-qa_kernel_lvm2_sle15@ppc64le-virtio fails in <a href="#">execute_test_run</a>			
<b>Reproducible</b>			
Fails since (at least) Build <a href="#">376.1</a>			
<b>Expected result</b>			
Last good: (unknown) (or more recent)			
<b>Further details</b>			
Always latest result in this scenario: <a href="#">latest</a>

- Status changed from New to Closed

Close this ticket, because the parent task poo#19362 is try to remove the dependency with qa\_testset\_automation, so change to remove the requirement in issue testsuites, such as lvm2.
