Category:		Estimated time:	0.00 hour
Target version:			
Description			
after moving the package list generator to the new vm the recommends are no longer generated			

History

#1 - 2014-08-19 15:19 - Inussel

- % Done changed from 0 to 30

when using rpms2solv the solv files on the packagelists vm and my workstation are exactly the same. Not so when using createpackagedescr. so maybe related to susetags2solv

#2 - 2014-08-20 14:49 - Inussel

- Status changed from New to Resolved

- % Done changed from 30 to 100

the cached file used by createpackagedescr were old and didn't contain suggests etc.
