#### Description

### Observation

openQA test in scenario sle-12-SP2-Server-DVD-Updates-x86\_64-mau-qa\_kernel\_kexec@64bit fails in [kernel\\_kexec](#)

### Reproducible

Fails since (at least) Build [20180123-4](#)

### Expected result

Last good: [20180123-3](#) (or more recent)

### Further details

Always latest result in this scenario: [latest](#)

Recent migration to systemctl function broke behavior of the test:

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/commit/21fff9096f3445cf46ebaf2fa33ed88dad12fa59#diff-39dea55692dae7626c926980965f40b>

- `type_string("systemctl kexec\n");` []-
- `systemctl 'kexec';`

Systemctl proceeds correctly with kexec - system is rebooted - but function will timeout (because of reboot).

**Test died: command 'systemctl --no-pager kexec' timed out at /var/lib/openqa/cache/tests/sle/lib/utils.pm line 139.**

#### History
