<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
<b>Observation</b>			
unexcepected window about change of master password ..			
openQA test in scenario sle-12-SP3-Desktop-DVD-Updates-x86_64-qam-regression-firefox@64bit fails in <a href="#">firefox_passwd</a>			
<b>Reproducible</b>			
Fails since (at least) Build <a href="#">20180306-2</a>			
<b>Expected result</b>			
Last good: <a href="#">20180306-1</a> (or more recent)			
<b>Further details</b>			
Always latest result in this scenario: <a href="#">latest</a>			

#### History

##### #1 - 2018-04-04 14:45 - vsvecova

- Subject changed from [qam] test fails in firefox\_passwd to [qam] test fails in firefox\_passwd - pwd change confirmation window hinders test from proceeding

Still occasionally happening.

The test opens about:preferences on line 70 and wants to click the security icon, but cannot find it because there is still the password change confirmation window, which was supposed to be closed earlier, but wasn't (line 38-41 of the code). The window is focused and the security icon is therefore greyed out.

- % Done changed from 0 to 100

I was having trouble trying to identify the issue because I was mistakenly thought that some part of the code was being skipped, but the behaviour found in the runs with the issue. I was also not able to reproduce the issue and the logs from previous runs were not available anymore in the servers.

Working with pcervinka, he pointed out that the issues was not happening from April 09 2018

It was found later that the previous poo [#28291](#) had already addressed the problem with the following commit <https://github.com/os-autoinst/os-autoinst-distrib-suse/commit/c000f37a71a9afdbaae2e7747cd40c3ecd1fe610>

accounting for the difference in the script lines that had effectively run since the commit was made.
