

openQA Project - action #33580

Jobs are assigned to workers with different backend

2018-03-21 11:45 - dasantiago

Status:	Rejected	Start date:	2018-03-21
Priority:	Normal	Due date:	
Assignee:	okurz	% Done:	0%
Category:	Concrete Bugs	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
Related to poo#20812.			
Steps to reproduce:			
1- Clone a svirt job:			
<pre>/usr/share/openqa/script/clone_job.pl --from https://openqa.suse.de --host tragicbox.suse.cz 1538022 VIRSH_HOSTNAME=XXXXXXXXX VIRSH_PASSWORD='XXXXXX' VIRSH_VMM_FAMILY=xen BACKEND=svirt VIRSH_VMM_TYPE=hvm VIRSH_GUEST=XXXXXXXXXXXXX WORKER_HOSTNAME=XXXXXX VIRSH_GUEST_PASSWORD=XXXXXX VIRSH_INSTANCE=20</pre>			
2- worker.ini containing:			
<pre>BACKEND=qemu WORKER_CLASS = qemu_x86_64,qemu_i686,qemu_i586,64bit,svirt-xen,caasp_x86_64,svirt-hyperv</pre>			
The job will be assigned to this worker and this produces confusion as in the settings tab in OSD, we will see BACKEND: svirt			
but on the vars.json in the pool folder we will see BACKEND: qemu

- Status changed from New to Rejected

- Assignee set to okurz

As there hadn't been any followup and I am not aware ever seeing this (again) we should reject
