#### History

##### #1 - 2018-03-29 03:50 - qmsu

- Priority changed from Normal to High

##### #2 - 2018-03-29 07:35 - qmsu

- Subject changed from [sle][migration][sle15] test fails in grub\_test\_snapshot -- grub2 screen happened before catch to [sle][migration][sle15] test fails in grub\_test\_snapshot -- grub2 screen wasn't shown occasionally

The grub2 screen should be shown after bootloader, but in this case we only see a black screen at [https://openqa.suse.de/tests/1563717#step/grub\\_test\\_snapshot/10](https://openqa.suse.de/tests/1563717#step/grub_test_snapshot/10)

This failure is not much observed in upgrade tests: in most cases, the grub screen can be shown after bootloader.

Not really necessary to update the test module (unless the issue is seen many times), for now restart job should be fine.
