Suggestions			
<ul style="list-style-type: none">• Check out if gdm_session_switch can work on openSUSE Tumbleweed• If yes, also check on openSUSE Leap 15.0, if not consider deleting the whole test module• Delete the section about Leap 42.2 which is out of maintenance			

History

#1 - 2018-04-04 08:56 - qkzhu

I am downloading the latest TW and Leap15 image, after that I will port this case to TW and Leap15

#2 - 2018-04-17 03:27 - qkzhu

This case makes sense to gdm testing, but the available sessions vary from openSUSE to SLE:

TW:

- GNOME
- GNOME on Xorg
- IceWM Session

Leap 15:

- GNOME
- GNOME on Xorg
- IceWM Session
- TWM

SLED15:

- GNOME
- GNOME Classic
- GNOME on Xorg
- IceWM Session
- SLE Classic
- SLE Classic on Xorg

SLES15 with WE:

- GNOME
- GNOME Classic
- IceWM Session
- SLE Classic

Solutions:

1. Merge gdm_session_switch and gnome_classic_switch
2. Porting the case to both openSUSE and SLE

- Assignee changed from qkzhu to yfjiang

I'll need some time to do a full review based on the recent changes on wayland/x and sessions. Keep it in my queue atm.

This openQA tests item has a dependency on the decision made in the bug:

https://bugzilla.opensuse.org/show_bug.cgi?id=1095537

Keep Frederic in the watcher's list as well.
