Target version:	Milestone 16		
Difficulty:	medium		

Description

Observation

openQA test in scenario opensuse-15.0-DVD-x86_64-update_Leap_42.2_cryptlvm@uefi fails in [keymap_or_locale](#)

Reproducible

Fails since (at least) Build [188.1](#)

Expected result

Last good: [187.1](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

Acceptance criteria

Analyse if currently active window loses focus due to notification pop up

History

#1 - 2018-04-05 13:06 - okurz

- Subject changed from test fails in keymap_or_locale to [functional][u][fast]test fails in keymap_or_locale - again!
- Due date changed from 2018-04-12 to 2018-04-10
- Target version set to Milestone 15

#2 - 2018-04-05 16:33 - mloviska

Seems like the string was not typed in xterm because of lost focus. I guess, it is because of the notification popup which I have not noticed in the previous successful runs.

```
testapi::type_string(string=~!@#%&*^0_+^', max_interval=250, wait_screen_changes=0, wait_still_screen=0)
```

Do we encounter a product change ? Nevertheless I do not see any valid reason for this commotion and overreaction.

#8 - 2018-04-16 08:17 - mloviska

9/10 runs are passing fine [opensuse-15.0-DVD-x86_64-Build191.1-update_Leap_42.2_cryptlvm@uefi](#). But maybe we could exclude the notification area from a needle, wdyt? http://dhcp228.suse.cz/tests/1564#step/keymap_or_locale/1

#9 - 2018-04-18 12:34 - mloviska

#10 - 2018-04-18 12:34 - mloviska

- Status changed from Workable to Feedback

#11 - 2018-04-24 08:53 - mgriessmeier

- Due date changed from 2018-04-24 to 2018-05-08

- Target version changed from Milestone 15 to Milestone 16

waiting for merge, moving to S16

#12 - 2018-04-26 06:52 - mloviska

Turning desktop notification off by issuing "gsettings set org.gnome.desktop.notifications show-banners false" does not really affect this particular popup (maybe popups in general ?!). Turning off [over here](#) does not prevent the notification to appear [over here](#) later on anyway. Any other ideas how to disable this particular notification are very much appreciated!

#13 - 2018-04-26 12:35 - mloviska

Disabling Deja Dup application.

PR:

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/4948>

#14 - 2018-04-30 08:44 - okurz

- Status changed from Feedback to Resolved

PR merged, <https://openqa.opensuse.org/tests/665524> looks fine
