Target version: future	
Difficulty: medium	

Description Observation openQA test in scenario sle-15-Installer-DVD-x86_64-USBinstall@uefi fails in consoletest_setup also failed in openQA test in scenario sle-15-Installer-DVD-ppc64le-registered+gnome+dev_tools_all_packages_dvd@ppc64le in consoletest_setup Reproducible Fails since (at least) Build 543.1 (current job) Test failed because 'hard' was typed instead of 'bernhard' on login screen. Seems like random fail. But at the same time there was a similar issue in one of the previous builds (Build472.5), when password was typed instead of login. Expected result Last good: 540.4 (or more recent) Suggestions * Try to create a needle with the cursor included <ul style="list-style-type: none">• Ensure the corresponding needle check is called with the no_wait => 1 option to catch the blinking cursor.• Find out in which part of the module the fail appears• the problem seems to be that generic-text-login is matching way too early and the test starts to type too early• this should be fixed in the parent task, so revisit this as soon as blocker is solved If the above does not work, maybe wait_still_screen can work with some tweaking although I doubt this can be stable as the cursor would blink. Further details Always latest result in this scenario: latest

- Status changed from New to Workable

#8 - 2018-05-18 07:49 - jorauch

This looks exactly like <https://progress.opensuse.org/issues/34471>

Would wait for it to be fixed and then revisit this.

#9 - 2018-05-23 11:13 - jorauch

- Status changed from Workable to In Progress

Trying Sergios PR for this, might become difficult because of randomness

#10 - 2018-05-23 11:51 - jorauch

Will start 100 runs over the next weekend for this, I see no other safe way to check this

#11 - 2018-06-05 08:50 - jorauch

- Subject changed from *[sle][functional][medium][u] test fails in consoletest_setup - login prompt not ready to type - missing keys while typing login* to *[sle][functional][medium][u] test fails in consoletest_setup - generic text login matching too early, causing mistyping -- was " login prompt not ready to type - missing keys while typing login"*

- Description updated

- Due date changed from 2018-06-05 to 2018-06-19

- Status changed from In Progress to Blocked

- Priority changed from High to Normal

The 100 runs sadly all failed during the installation
