Target version:			
Description			
I'd like to publish an FTP tree for RISC-V from openSUSE:Factory:RISCV to download.opensuse.org/ports/riscv/tumbleweed/repo/oss/.			
Adrian asked me to write here to get it prepared.			
Thanks, Andreas.

"And now for something completely different."			

History

#1 - 2018-05-08 12:43 - Andreas_Schwab

The FTP tree is now building properly, but it is published to download.opensuse.org/repositories/openSUSE:/Factory:/RISCV/images/repo/ (using varying subdirectories) instead of download.opensuse.org/ports/riscv/tumbleweed/repo/oss/.

Andreas.

- Category set to OBS

- Assignee set to opensuse-admin-obs

- Private changed from Yes to No

#3 - 2018-07-16 12:46 - Andreas_Schwab

Any news?

Andreas.

#4 - 2018-07-24 09:52 - adrianSuSE

- Status changed from New to Resolved

it is setup now.

No debug tree until there is some really broader need for them

#5 - 2018-07-30 11:44 - Andreas_Schwab

The images repository is no longer being published.
