Description

Observation

openQA test in scenario sle-15-Installer-DVD-x86_64-create_hdd_gnome+we@64bit-2gbram fails in [scc_registration](#)

create_hdd_ses6_textmode@64bit failed at:

- https://openqa.suse.de/tests/1628685#step/scc_registration/21

The failure was caused by:

- <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/4882>

which updated assert_and_click "scc-code-field-\$addon"; to assert_and_click "scc-code-field-\$addon", 60;

but this led to:

- <https://openqa.suse.de/tests/1629897/file/autoinst-log.txt> [2018-04-19T04:54:40.0979 CEST] [debug] <<< testapi::assert_and_click(mustmatch='scc-code-field-we', **button=60**, timeout=30)

Solution:

update that line to:
assert_and_click "scc-code-field-\$addon", 'left', 60;

History

#1 - 2018-04-19 04:55 - qkzhu

- Status changed from New to In Progress

- Assignee set to qkzhu

fixed by: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/4886>

#2 - 2018-04-19 06:29 - qkzhu

- Status changed from In Progress to Resolved

passed at: https://openqa.suse.de/tests/1629961#step/scc_registration/17
