openQA Tests - action #35574

[sle][functional][u][xen][hard] test fails in user_defined_snapshot - interact with grub2 in the serial console

2018-04-26 07:32 - JERiveraMoya

Status: Rejected
Priority: Low
Assignee: SLindoMansilla
Category: New test
Target version: future
Difficulty: hard

Description

Observation

openQA test in scenario sle-15-Installer-DVD-x86_64-extra_tests_on_gnome@svirt-xen-pv fails in user_defined_snapshot

Reproducible

Fails since (at least) Build 573.1

When Xen PV parent job create_hdd was failing we were not able to see the failure. Jobs is failing interacting with grub.

Expected result

grub2 is not expected to be present on VNC, but we should be able to interact with grub in serial console.

Last good: (unknown)

Suggestions

- Remove the test module which never worked on this backend/machine or only schedule it in "test development"
- Decrease prio of ticket and postpone
- Then wait…
- Then fix it
- ???
- profit!!

Further details

Always latest result in this scenario: latest

History

#1 - 2018-04-30 21:44 - okurz
- Subject changed from [sle][functional][u][fast] test fails in user_defined_snapshot - interact with grub2 in the serial console to [sle][functional][u][fast] test fails in user_defined_snapshot - interact with grub2 in the serial console
- Due date set to 2018-05-22
- Category changed from Bugs in existing tests to New test
- Target version set to Milestone 16

Because the job seems to have never completed successfully I consider this a "New test" ticket. I recommend to move the scenario to "test development" and then we plan the further work on this ticket to a later sprint.

- Status changed from New to Workable
- Difficulty set to hard

#3 - 2018-05-09 08:40 - okurz
- Target version changed from Milestone 16 to Milestone 18

Too many new tests for S17, still, delaying

I worked on it for a while but found out that way to many changes are required. Here is my old core:
https://github.com/mnowaksuse/os-autoinst-distri-opensuse/tree/svirt_xen_pv_user_defined_snapshot

#14 - 2018-07-19 13:50 - oorlov
- Description updated
- Assignee deleted (oorlov)

I've removed the module from the job for xen pv.
okurz, what should I do in order to postpone the ticket (e.g. change the Milestone or something else) in order to satisfy the 2nd step from the Suggestion?

#15 - 2018-07-19 15:21 - oorlov
- Status changed from Workable to Feedback
- Assignee set to oorlov

#16 - 2018-07-27 06:34 - okurz
- Due date deleted (2018-07-31)
- Status changed from Feedback to Workable
- Assignee deleted (oorlov)
- Target version changed from Milestone 18 to future

To answer your question: set back to workable, delete due date and unassign. I will do that for you now.

#17 - 2018-10-09 13:03 - okurz
- Status changed from Workable to New

Bulk action to set status back to "New" for older tickets which are in "future". They would need to be revisited in time when we come up with a defined plan and assign to a milestone.

#18 - 2019-03-14 12:32 - okurz
- Priority changed from Normal to Low

let's focus more on improving our current tests and workflows first. Putting to "holding tank" :)

#19 - 2020-07-28 17:14 - SLindoMansilla
- Status changed from New to Rejected
- Assignee set to SLindoMansilla

This ticket is very old and currently the problem we see in user_defined_snapshot is #65058

We can reopen/recreate this ticket if we can reproduce it again.
