Description

Observation

openQA test in scenario sle-15-Installer-DVD-x86_64-addon-module-http@64bit fails in

[addon_products_sle](#)

matching the needle *addon-menu-active-2-20180220* created by

```
commit e0ba6843
```

```

which should not match. My proposal is to bump the "matching level"

As per coolo's comment, bumping matching level won't help as it's already 100%.

We should rather create needles, so we assert that checkbox is checked: see *addon-menu-active-2-20180220* vs *addon-menu-active-20180220* in https://openqa.suse.de/tests/1667144#step/addon_products_sle/6

Hence, removing needle which matches radio buttons only.

Hint

Use <https://openqa.suse.de/admin/needles> to find out if some needle is in use, so removal of wrong needles doesn't break existing

scenarios.

Reproducible

Fails since (at least) Build [597.2](#) (current job)

Expected result

Last good: [594.1](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2018-05-04 09:51 - coolo

It matches 100% - how high do you want to go?
