<b>Target version:</b>	
<b>Description</b> Hi openSUSE Heroes,  I'm writing on behalf of maintainers of software.opensuse.org site. We'd like to setup a Prometheus server for monitoring the software.opensuse.org. This could be later used for monitoring other services as well. The reason we want to use Prometheus is that there is already good knowledge about this technology in SUSE (SUMA, Storage, Container teams).  Everything we need for this is a machine, ideally we'd like to manage it with salt (some team member of ours would have access to it). Would that be possible for you to create one for us?  Cheers, Franky.	

### History

#### #1 - 2018-06-01 08:36 - pjessen

- Category set to Monitoring
- Private changed from Yes to No

#### #2 - 2018-06-01 08:54 - fkobzik

Update: after the comment from Jimmy Berry I suggest closing this ticket. It appears he can provide us access to the metrics.opensuse.org where we can install Prometheus.

#### #3 - 2018-06-05 10:57 - tampakrap

- Status changed from New to Rejected
