

## openQA Tests - action #36694

### [sle15sp3][desktop] Implement test cases for gnome-software/gnome-package-kit/packagekit.

2018-06-01 07:44 - yfjiang

<b>Status:</b>	New	<b>Start date:</b>	2018-06-01
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	GraceWang	<b>% Done:</b>	0%
<b>Category:</b>	New test	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
We have been lack of checking the packagekit mechanism in early development phase, and experienced some tough time to do a thorough check in the past.			
Automating such a scenario on one hand will make sure the toolset is tested in early development, on the other hand, it will remind us update-test-* should be ready in early development phase.			
Notice the update-test-* packages will be intended to remove in GMC. So the case is supposed to be failed (or softfailed) in GMC build.
