<b>Target version:</b>	T03B. Merge openQA changes to upstream		

#### Description

As we found out that scaling from a high resolution to 800x600 makes image matching harder we decided to go for 1024x768 as default resolution, force the installation to that resolution and don't scale anymore.

To migrate the existing needles in a manageable way there needs to be some support from os-autoinst.

#### History

##### #1 - 2013-04-24 10:21 - Inussel

- % Done changed from 0 to 100

- Status changed from New to Resolved

start.pl can now be called using scaledhack=1 (in addition to interactive\_crop) to make os-autoinst ask whether to edit any of the existing needles which didn't match. It will then replace the screenshot and scale the 800x600 needle to the 1024 resolution.

##### #2 - 2013-04-25 09:06 - aplanas

- Status changed from Resolved to Closed

##### #3 - 2013-05-27 17:30 - aplanas

- Estimated time set to 6.00 h
