Target version:	Done		
Difficulty:			
Description			
Now that we've got the docker images for travis from docker hub, coolo has proposed before to use obs registry (registry.opensuse.org) so... lets see...

- Status changed from New to In Progress

I guess this is in process: <https://github.com/os-autoinst/openQA/pull/1685>

#2 - 2018-06-15 12:00 - szarate

- Follows action #35383: Create a docker container to run unit and integration tests added

#3 - 2018-06-15 14:07 - SLindoMansilla

- Subject changed from Try OBS docker registry to Try OBS registry (registry.opensuse.org)

- Description updated

#4 - 2018-06-21 13:28 - szarate

- Status changed from In Progress to Feedback

For cleaning purposes, i'm using (CID=\$(docker ps -a -q) && (docker kill \${CID}; docker rm \${CID})), but this can be improved to destroy the container once done...
