

openQA Tests - action #37438

[qam] test fails in kernel_ltp_fs - issue in qa_testsuite

2018-06-15 14:25 - pcervinka

Status:	Rejected	Start date:	2018-06-15
Priority:	Normal	Due date:	
Assignee:	pcervinka	% Done:	0%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			

Description

Observation

openQA test in scenario sle-12-SP3-Server-DVD-Updates-x86_64-mau-qa_kernel_ltp_fs@64bit fails in [kernel_ltp_fs](#)

Reproducible

Fails since (at least) Build [20180615-1](#)

Expected result

Last good: [20180614-4](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

```
# /usr/share/qa/qaset/run/kernel-all-run.openqa ; echo 4Kb5E-$?-
TARGET_RELEASE isn't defined!
Try parse it from /etc/SuSE-release
The TARGET_RELEASE is SLE12SP3
QASET_ROOT isn't SET !
The QASET_ROOT is /usr/share/qa/qaset
SQ_TEST_RUN_SET isn't set
Try my best to guess it
The SQ_TEST_RUN_SET is kernel-all
grep: ^SQ_TEST_RUN_SET=: No such file or directory

Subject: Re: Issue related to qa test suite

Hi Petr,

Yes, I implement a new feature of qaset to fetch job from remote server after install the qa_testset_automation,

this feature is for auto deploy.

I didn't know that openQA use qaset framework , however I check the fail issue .

please reset the qaset before you start to use qaset frame work :

```
"/usr/share/qa/qaset/qaset reset"
```

insert above cmd to ur test should fix this.

and I check with sero :

(09:58:10 AM) sero: Change from using qa_run.pm to use install_test_suite.pm, prepare_qa_repo.pm and execute_test_run.pm

(09:58:31 AM) sero: Like what we do in Kernel job group.

- Status changed from Workable to Rejected

Not an issue anymore, also ltp testing will redone in <https://progress.opensuse.org/issues/37928>.
