Create workaround when Release Notes missing in Suggested Partitioning

2018-06-26 08:24 - JERiveraMoya

Status:	Rejected	Start date:	2018-06-26
Priority:	Low	Due date:	
Assignee:	riafarov	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	future		
Description			
Observation			
openQA test in scenario opensuse-15.1:S:A-Staging-DVD-x86_64-RAID1@64bit fails in partitioning_raid			
The focus is on Next, and because the shortcut is different (between leap 15 and staging) due to the Release Notes is not present, is leading to send some keys in the next test module that doesn't have any effect except for the return key, that makes it clicking in Next finally going the wrong dialog in the installer.			
Release Notes should be made available, However, we can think about improving the test module or at least implement a workaround pointing to a bug about missing release notes for now			
Reproducible			
Fails since (at least) Build 139.3 (current job)			
Expected result			
Last good: (unknown) (or more recent)			
Further details			
Always latest result in this scenario: latest

- Project changed from openQA Tests to qe-yast

- Subject changed from [\[sle\]\[functional\]\[y\] test fails in partitioning_raid - Create workaround when Release Notes missing in Suggested Partitioning](#) to [Create workaround when Release Notes missing in Suggested Partitioning](#)

- Category deleted (Enhancement to existing tests)

- Priority changed from Normal to Low

We will be able to solve that with libyui, as of now we should rather fail the test and get the bug fix. Hint to look for Release notes button still might be useful as it affects shortcuts which break test in the end.

#4 - 2020-10-26 12:41 - riafarov

- *Status changed from New to Rejected*

- *Assignee set to riafarov*

Realistically, I don't see that we will have resources to apply this improvement and we work on ultimate solution, so rejecting.
