<b>Category:</b>	Development	<b>Estimated time:</b>	6.00 hours
<b>Target version:</b>	T10. Create a development mode in openQA		

#### Description

There is a lot of information that we need to present to the user in the webUI when a test fails.

- The name of the tag used to search the needle(s)
- The diff area between the image and the needle
- Some option to create fast a new needle using the best candidate

Now, search() have an optional parameter that, if is True, return a tuple (undef, image). The image here is the difference between the image and the needle.

#### History

##### #1 - 2013-05-03 16:47 - aplanas

- Assignee deleted (*Inussel*)

##### #2 - 2013-05-28 09:32 - aplanas
