Description

There are a few machines that use remote backend

- IPMI
- s390x
- XEN
- PPC

The test module first_boot is becoming less maintainable since specific code are added without paying attention to duplicated code.

Acceptance criteria

- AC: There is no duplicate code for remote backends

Latest results

SLE 12-SP4

- IPMI
- s390x Z KVM
- s390x Z VM
- XEN HVM
- XEN PV
- PPC PowerVM (not yet available)

Move to new QSF-u PO after I moved to the "tools"-team. I mainly checked the subject line so in individual instances you might not agree to take it over completely into QSF-u. Feel free to discuss with me or reassign to me or someone else in this case. Thanks.
