| Difficulty: | | | |
| Description | | | |
| Observation | | | |
| openQA test in scenario | | | |
| sle-12-SP2-Server-DVD-Updates-x86_64-mau-webserver@64bit | | | |
| fails in several tests involving a non-root console: | | | |
| <ul style="list-style-type: none">https://openqa.suse.de/tests/1833737#step/update_alternatives/4https://openqa.suse.de/tests/1833737#step/aplay/12https://openqa.suse.de/tests/1833737#step/openssl_alpn/8https://openqa.suse.de/tests/1833737#step/curl_ipv6/2https://openqa.suse.de/tests/1833737#step/wget_ipv6/5https://openqa.suse.de/tests/1833737#step/gpg/2https://openqa.suse.de/tests/1833737#step/shells/5 | | | |
| Reproducible | | | |
| Fails since (at least) Build [20180717-2] | | | |
| The reason is obvious: a non-root user is usually not permitted to write to /dev/ttyS0. | | | |
| Expected result | | | |
| Last "good" (above tests not present yet): | | | |
| SLE-12-SP2 Build 20180717-1 | | | |
| https://openqa.suse.de/tests/1833122 | | | |

History

#1 - 2018-07-18 10:00 - kgw_suse

- Assignee set to okurz

Tentatively assigned to okurz, since tests curl_ipv6.pm and wget_ipv6.pm contain the possibly problematic code

```
select_console 'user-console';
assert_script_run(...);
```

Same also in update_alternatives.pm

#2 - 2018-07-19 18:42 - okurz

- Related to action #30613: [functional][y][hard] script_output might include extra serial output added

#3 - 2018-07-19 18:42 - okurz

- Related to action #38525: [sle][functional][u][fast] test fails in boot_to_desktop - booting is not completed added

#4 - 2018-07-19 18:43 - okurz

- Related to action #37027: [tw][desktop] Update create_hdd_* to make sure right permissions added

#5 - 2018-07-19 18:45 - okurz

- Subject changed from [qam] job mau-extratests fails in new tests update_alternatives, aplay, openssl_alpn, curl_ipv6, wget_ipv6, gpg, shells to [functional][u][fast][qam] job mau-extratests fails in new tests update_alternatives, aplay, openssl_alpn, curl_ipv6, wget_ipv6, gpg, shells

- Description updated

- Due date set to 2018-07-31

- Category set to Bugs in existing tests

- Status changed from New to Feedback

- Priority changed from Normal to High

- Target version set to Milestone 18

Just what I thought, caused by <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/5387> . I reverted that PR by yuanren10 . <https://openqa.suse.de/tests/1848577> is a new job in the mentioned scenario currently scheduled. Other failures can be retrigged as well.

#6 - 2018-07-20 13:20 - okurz

- Status changed from Feedback to Resolved

<https://openqa.suse.de/tests/1848577> did not fail so I guess we are good for the time being.
