

openQA Project - action #38486

[functional][u] add capability flags to os-autoinst backends (or tests)

2018-07-17 15:23 - dheidler

Status:	Rejected	Start date:	2018-07-17
Priority:	Normal	Due date:	
Assignee:	mgriessmeier	% Done:	0%
Category:	Feature requests	Estimated time:	0.00 hour
Target version:	future		
Difficulty:			
Description			
In https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/lib/main_common.pm#L885 (for example) we have many checks on the name of the backend. This is getting more and more hard to read. It could be easier to use capability flags in the backends and do the decisions based on this flags.

History

#1 - 2018-07-17 16:02 - coolo

what would that capability be? 'stable_vnc_clicks'?

#2 - 2018-07-17 16:14 - okurz

let's start with something for the "remote" backends, i.e. the ones where we need to connect over SSH or VNC rather than ttys. Or phrased inverse: The capability for the qemu-backends would be "local_ttys"?

#3 - 2018-07-20 07:46 - okurz

- Subject changed from [functional] add capability flags to os-autoinst backends to [functional][u] add capability flags to os-autoinst backends (or tests)
- Due date set to 2018-09-25
- Category set to 132
- Target version set to Milestone 19

#4 - 2018-07-20 08:12 - coolo

This sounds more like a property of the console to me

- Due date deleted (2018-09-25)
- Status changed from Feedback to Blocked
- Assignee changed from mgriessmeier to okurz
- Target version changed from Milestone 19 to future

could be. Let's look into [#33388](#) first

#8 - 2019-05-22 10:38 - okurz

- Assignee changed from okurz to mgriessmeier

Move to new QSF-u PO after I moved to the "tools"-team. I mainly checked the subject line so in individual instances you might not agree to take it over completely into QSF-u. Feel free to discuss with me or reassign to me or someone else in this case. Thanks.
