## History

### #1 - 2018-07-26 10:00 - okurz

- Status changed from New to Feedback

- Assignee set to okurz

Caused by <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/5460>, fixed with

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/commit/393e1ec224f43141a8f9efdbc6adb5b71499f623> . Retriggered tests, monitoring

### #2 - 2018-07-26 10:06 - okurz

- Has duplicate action #38864: [functional][opensuse][u] errors--compilation from first\_boot.pm added

### #3 - 2018-07-26 12:03 - zluo

The problem was

```
use version_utils 'sle_version_at_least';
```

line 60 of first\_boot.pm:

```
if (!is_sle('<=15') && !is_leap('<=15.0') && check_var('ARCH', 'aarch64') && check_var('DESKTOP', 'gnome')) {  
..
```

```
--
```

Please see

<http://e13.suse.de/tests/7118>

I changed

```
use version_utils 'sle_version_at_least'; to use version_utils ;
```

**#4 - 2018-07-26 14:19 - okurz**

- *Status changed from Feedback to Resolved*

I already mentioned the commit in master that fixed it.

No further failures seen on production.
