- Subject changed from test fails in pidgin\_IRC to [desktop] test fails in pidgin\_IRC

I hope you don't mind if I assign it to [desktop] as it is a SLED test and also the pidgin\_IRC tests are maintained by the desktop team, isn't it? ;)

We have the same issue (as we are sharing the test). I updated this test recently to work on SLE15+ and I am fixing this for the qam group.

So this issue is dependent on network, and it has gone, at least for build 276.

Fixed since build 276.
