Target version:	Done		
Difficulty:			

Description

sle-15-SP1-Installer-DVD-aarch64-Build21.2-ltp_fs_ext4@aarch64-virtio has in it's settings:

```
"START_AFTER_TEST  install_ltp+sle+Installer-DVD,install_ltp+sle+15-SP1+Installer-DVD"
```

Unfortunately, the only test I could find is "install_ltp+sle+15+Installer-DVD" (without '-SP1').
As a result, the testcases starts immediately, and fails .

I did not check but suspect that more of the kernel testcases suffer from that.

History

#1 - 2018-08-15 07:11 - sbehlert

- Project changed from openQA Project to SUSE QA

#2 - 2018-08-15 07:12 - sbehlert

- Project changed from SUSE QA to openQA Tests

- Category set to Bugs in existing tests

#3 - 2018-08-15 09:00 - sebchlad

- Target version set to 445

#4 - 2018-12-06 12:45 - sebchlad

- Status changed from New to Resolved

- Assignee deleted (sebchlad)

- Target version changed from 445 to Done
