Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:	Milestone 18		
Difficulty:			

Description

Observation

openQA test in scenario sle-15-SP1-Installer-DVD-aarch64-create_hdd_hpc_textmode@aarch64 fails in [welcome](#)

The test stops "before product selection". It's not obvious to me if it's a product or an openqa issue.

Reproducible

Fails since (at least) Build [15.6](#)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2018-08-16 07:50 - sbehlert

Also fails for SLES4sAP.

#2 - 2018-08-16 09:10 - sbehlert

- Assignee set to jorauch

- % Done changed from 0 to 100

Ok, reason identified: The Testmodule was changed, and requires new needles compared to SLE 15.

Unfortunately some products did not get a needle. HPC and SAP seems to be the ones affected.

With some help the HPC needle was created, and I added now the SLES4SAP needle.

should be fixed, but a verification is welcome ;)

#5 - 2018-08-16 10:33 - JERiveraMoya

It was expected that some needles were missing. [HPC needle](#) and [SLES4SAP needle](#) LGTM. Thanks.

#6 - 2018-08-16 10:53 - okurz

- Subject changed from test fails in welcome to *[functional][y][fast] test fails in welcome - necessary adaptations to new system_role code*
- Due date set to 2018-08-28
- Status changed from New to In Progress
- Priority changed from Normal to High
- Target version set to Milestone 18

Considered "fast" as it is a test regression introduced by our recent changes.

#7 - 2018-08-17 08:52 - JERiveraMoya

- Status changed from In Progress to Resolved

I will resolve it, but if more cases are discovered we can reopen it.
