openQA Tests - action #40337
[functional][u] test failing to add systemd test repo - missing QA repo for Leap 15.1
2018-08-28 14:39 - Inussel

Status: Rejected
Priority: Low
Assignee: SLindoMansilla
Category: Bugs in existing tests
Target version: future

Description

Observation

openQA test in scenario opensuse-15.1-DVD-x86_64-suse_patches-systemd_testsuite@64bit fails in systemd_testsuite

Reproducible

Fails since (at least) Build 270.3

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: latest

History

#1 - 2018-08-29 07:21 - Inussel
same in systemd_testsuite

#2 - 2018-09-11 06:46 - okurz
- Subject changed from zypper_ar and kdump_and_crash disagree about repo names to [functional][y] zypper_ar and kdump_and_crash disagree about repo names
- Target version set to Milestone 20

sounds related to "download.o.o changes"?

#3 - 2018-09-26 05:17 - okurz
This is an autogenerated message for openQA integration by the openqa_review script:
This bug is still referenced in a failing openQA test: suse_patches-systemd_testsuite
https://openqa.opensuse.org/tests/759967

#4 - 2018-10-10 05:18 - okurz

#5 - 2018-10-11 15:24 - riafarov
- Subject changed from [functional][y] zypper_ar and kdump_and_crash disagree about repo names to [functional][u] test failing to add systemd test repo
- Description updated
Part with kdump was resolved here: [#40286](https://bugzilla.redhat.com/show_bug.cgi?id=40286), hijacking for systemd failure, which has different root cause.

**#8 - 2018-11-21 15:43 - SLindoMansilla**
A new package branched from Leap 15

needs to be created for Leap 15.1

**#9 - 2018-11-21 15:46 - okurz**
- Status changed from New to Feedback
- Assignee set to SLindoMansilla
- Priority changed from High to Low
- Target version changed from Milestone 20 to Milestone 22

I moved the scenario to the development job group for now.

@SLindoMansilla I assume you will track the package addition?

- Status changed from Feedback to Workable

yes

- Subject changed from [functional][u] test failing to add systemd test repo to [functional][u] test failing to add systemd test repo - missing QA repo for Leap 15.1
- Status changed from Workable to In Progress

**#12 - 2018-11-27 11:56 - SLindoMansilla**
Leap 15.1 is still using systemd 234 like Leap 15.0:

The same package build can be reused.

The test module needs to be adapted for that.

PR to reuse Leap 15.0 systemd tesuite for Leap 15.1: [https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6302](https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6302)

**#14 - 2018-11-27 18:45 - SLindoMansilla**
- Status changed from In Progress to Feedback

PR to require $qa_head_repo is always set before continue: [https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6305](https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6305)

**#16 - 2018-12-14 12:35 - SLindoMansilla**
- Related to action #45158: [systemd] Implement systemd testsuite as openQA perl module added

#17 - 2018-12-14 12:36 - SLindoMansilla
- Status changed from Feedback to Workable

PR merged.

#18 - 2018-12-14 12:46 - SLindoMansilla
With all the problems described in #45158 and that https://build.opensuse.org/package/show/devel:openSUSE:QA:Leap:15/systemd-v234-testsuite is no more linked by https://build.suse.de/package/show/QA:Head/systemd-v234-testsuite. The fixes to the custom test suite provided by tblume are no more submitted into Leap's repository, and there is even no repository for 15.1 to differ from 15.

#19 - 2018-12-19 10:06 - SLindoMansilla

#24 - 2020-01-13 13:31 - SLindoMansilla
Too late, Leap 15.1 is already released and 15.2 is the version in development.
