

openSUSE 13.2 Release - action #4034

merge back maintenance updates

2014-10-13 09:37 - Inussel

Status:	Resolved	Start date:	2014-10-27
Priority:	Normal	Due date:	2014-10-29
Assignee:	coolo	% Done:	0%
Category:		Estimated time:	4.00 hours
Target version:	13.2 GM		
Description			
maintenance updates from the update project need to be merged back into the main repo			
<ul style="list-style-type: none">• use osc checkupdate (https://github.com/coolo/factory-auto/osc-plugin-checkupdate.py) to find updated packages• copy them back using 'osc copypac -e openSUSE:13.2:Update openSUSE:13.2 -m "Update to match Update channel update#."'; On purpose do it by hand without automation to avoid screwups• adjust the release number to be higher than in the update repo using FIXME¹• remove updates from the update repo by using "osc killupdate NUMBER"			
[1] adjust the release number by checking the state of the package 'osc getbinaries openSUSE:13.2:Update . standard x86_64' and then writing higher revision to .spec file. To submit this update to repository just use 'osc ci --noservice -m "Add revision to ensure new-enough over Update channel."'			
There should be a way to do this by means of obs
