New top level project in OBS

2018-08-31 07:29 - tchvatal@suse.cz

Status:	Rejected	Start date:	
Priority:	Normal	Due date:	
Assignee:	opensuse-admin-obs	% Done:	100%
Category:	OBS	Estimated time:	0.00 hour
Target version:			
Description			
Hello,			
Could you please create me a top level project called PERLUR (all uppercase) in the OBS?			
It would be special project containing backports for Leap/SLES/Centos of package latest versions done by Mark (here in CC).			
TIA			
Tom			
Subtasks:			

History

#1 - 2018-08-31 11:57 - cboltz

- Category set to OBS

- Assignee set to opensuse-admin-obs

I'll ask the usual question before handing over to the OBS admins: Does this really need to be a top-level project, or would a subproject under an existing (which?) project also be ok?

#2 - 2018-08-31 11:59 - tchvatal@suse.cz

- File signature.asc added

As this is request from the member to have toplevel project for this fun with subprojects for various distributions I think we should be fine with toplevel prj.

Tom

#3 - 2018-09-14 12:49 - cboltz

- *Private changed from Yes to No*

OBS team, any progress on this?

#4 - 2018-09-14 13:04 - adrianSuSE

We create new top level projects only under the thread of multiple megaton bombs...

Why not just use existing devel:languages:perl:UR or alike? What is standing the UR for?

#5 - 2019-12-01 11:55 - Irupp

- *Status changed from New to Rejected*

Closing old tickets, feel free to re-open (by reply), if the issue is still valid.
