openQA Tests - action #40766
[functional][y] test fails in yast2_network_settings
10/09/2018 08:45 am - lnussel

Status: Resolved
Priority: High
Assignee: JERiveraMoya
Category: Bugs in existing tests
Target version: Milestone 19
Difficulty:

Description

Observation

openQA test in scenario opensuse-15.1-DVD-x86_64-yast2_gui@64bit fails in
yast2_network_settings

Needs to handle NetworkManager. NM is now default for desktop installs on 15.1

Reproducible

Fails since (at least) Build 300.2

Expected result

Last good: 299.2 (or more recent)

Further details

Always latest result in this scenario: latest

PR - Handle network manager default in openSUSE

#6 - 12/09/2018 09:40 am - riafarov
- Estimated time set to 3.00

#7 - 12/09/2018 01:16 pm - JERiveraMoya
- Status changed from Feedback to In Progress

#8 - 12/09/2018 03:44 pm - mlin7442

same for TW now https://openqa.opensuse.org/tests/753439#step/yast2_network_settings/7, no needs to be Leap 15.1+ specific.

#9 - 12/09/2018 06:03 pm - okurz

could it be that yast2_lan_restart in https://openqa.opensuse.org/tests/753633#step/yast2_lan_restart/14 has the same problem?

#10 - 13/09/2018 09:39 am - mlin7442

I thought so. And I found another one https://openqa.opensuse.org/tests/753961#step/yast2_lan_hostname/7

PR - Unschedule yast2_lan_restart_devices when Network Manager

#13 - 18/09/2018 06:08 am - JERiveraMoya

PR - Unschedule yast2_lan_restart_devices when Network Manager 2nd try (I thought it will be easy the condition ;( but it was not so straightforward, it needed more love ;) )

#14 - 18/09/2018 12:09 pm - JERiveraMoya

It's great you made sure the tests do not fail but I see one flaw unless I am really wrong here.

https://openqa.opensuse.org/tests/751370#step/yast2_network_settings/7 fails because the assert_screen only expects "yast2-lan-ui" but https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/tests/yast2_gui/yast2_network_settings.pm#L34 states that it should look for "yast2-lan-warning-network-manager" as well which it does not. I think the test code is not doing what it should and this is what we should look into.

#16 - 18/09/2018 12:51 pm - JERiveraMoya

This example that you mentioned is outdated, I am ignoring Leap during last days, unfortunately I cannot get the parent image not even retrigering like other times I did as the qcows disappear really fast and end up failing in some zypper that cannot get stuff from current build.
The logic for the warning should be ok also for Leap as it is working for TW. "yast2-lan-ui", I am not expecting any difference and the solution in code I think should intercept this warning. If some needle is missing I can create on the fly in prod as the build arrives for Leap 15.1.

#17 - 18/09/2018 02:56 pm - okurz
- Status changed from In Progress to Resolved

Sorry, I think I confused the two test modules "yast2_lan_restart_devices" and "yast2_network_settings". I think we are good here.

#18 - 21/09/2018 10:15 am - riafarov
- Duplicated by action #41141: [functional][y] test fails in yast2_lan_restart_devices - related to recent default changed to network manager? added

#19 - 24/09/2018 10:07 am - riafarov
- Related to action #41429: [functional][y] test fails in yast2_network_setup - another case related to NM is the default network management added

#20 - 25/09/2018 02:45 pm - riafarov
- Related to action #41564: [functional][y] test fails in yast2_network_setup added
