**Description**

#### Observation

openQA test in scenario sle-15-Desktop-DVD-Updates-x86\_64-qam-regression-gnome@64bit fails in [application\\_starts\\_on\\_login](#)

#### Reproducible

Fails since (at least) Build [20180621-1](#)

#### Expected result

Last good: (unknown) (or more recent)

#### Further details

Change on Firefox icon on SLE 15 required the creation of a new needle.

Always latest result in this scenario: [latest](#)

#### History

##### #1 - 2018-09-25 20:42 - okurz

- Subject changed from test fails in application\_starts\_on\_login to [desktop] test fails in application\_starts\_on\_login

- Assignee set to yfjiang

yfjiang, could you please help to find a new test module maintainer for application\_starts\_on\_login? I assume "xiaojun [xjin@suse.com](mailto:xjin@suse.com)" worked in your time but is not anymore?

##### #2 - 2018-09-25 21:06 - bfilho

Hello yfjiang, okurz,

Pcervinka was working on adjusting the needles. I was waiting for a complete run of regression-gnome before closing the issue. We had some issues in openqa today, so it was taking longer than usual.

It seems that application\_starts\_on\_login ran successful last time (please check run

[https://openqa.suse.de/tests/2092917#step/application\\_starts\\_on\\_login/1](https://openqa.suse.de/tests/2092917#step/application_starts_on_login/1)), but since it didn't finish on that run, I restarted it again.

##### #3 - 2021-06-10 09:09 - GraceWang

- Status changed from New to Resolved

Checked in sle-15-SP3-Desktop-DVD-Updates-x86\_64-Build20210610-1-qam-regression-gnome@64bit-virtio-vga

<https://openqa.suse.de/tests/6220706>, the application\_starts\_on\_login no longer fails anymore.

Also checked the result history, no application\_starts\_on\_login failed in the past month.

So, closed this ticket.
