Description

Observation

openQA test in scenario sle-15-Server-DVD-Incidents-Minimal-s390x-qam-minimal+sle15@s390x-zVM-hsi-l3 fails in [bootloader_s390](#)

Reproducible

Fails since (at least) Build [:8819:zypper.1537445974](#)

Expected result

Last good: [:8431:pam_pkcs11.1536766810](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2018-09-21 19:26 - bfilho

It seems that the image is missing on download location.

#2 - 2018-09-22 06:27 - coolo

- Assignee set to bfilho

It's a little less obvious - the repo is in fixed/, but s390 bootloader does not add the fixed/ part. So we install symlinks, but those go away over time

MR a salt change for the repos you guys need in addition:

<https://gitlab.suse.de/openqa/salt-states-openqa/blob/master/etc/master/cron.d/SLES.CRON#L23>

#3 - 2018-09-25 20:51 - okurz

- Subject changed from [qam][sle][s390x][functional] test fails in bootloader_s390 to [qam][sle][s390x] test fails in bootloader_s390

seems like related to what qam needs in particular, removing [functional]

#4 - 2018-09-26 07:57 - pcervinka

[coolo](#) I see that you set assignee to bfilho. Do you mean, that QAM should be responsible for workarounds in salt-states-openqa?

#5 - 2018-09-26 08:00 - coolo

Yes.

#6 - 2018-09-27 10:57 - osukup

- Assignee changed from bfilho to osukup

[coolo](#) | guess openQA gru service ?
