**Description**

#### Observation

openQA test in scenario sle-15-SP1-Installer-DVD-aarch64-create\_hdd\_hpc\_textmode@aarch64 fails in [releasenotes](#)

Requires a new needle, and afaiks some tagging. should be fairly easy and straight forward, but I'm not sure about the tagging...

#### Reproducible

Fails since (at least) Build [56.1](#)

#### Expected result

Last good: [53.7](#) (or more recent)

#### Further details

Always latest result in this scenario: [latest](#)
