Description			
Observation			
openQA test in scenario sle-12-SP4-Server-DVD-x86_64-virt-pvusb-sles15fcs-fv-on-developing-xen@64bit-ipmi fails in pvusb_run			
The error message is: "PVUSB_DEVICE is not properly set in workers.ini".			
Worker setup:			
<pre>"WORKER_CLASS" : "64bit-ipmi", "WORKER_HOSTNAME" : "10.160.2.26", "WORKER_ID" : 1114, "WORKER_INSTANCE" : 3,</pre>			
It works (https://openqa.suse.de/tests/2118690) with:			
<pre>"WORKER_CLASS" : "64bit-ipmi", "WORKER_HOSTNAME" : "10.162.2.88", "WORKER_ID" : 897, "WORKER_INSTANCE" : 1,</pre>

pvusb testcases need usb device be attached in server, and need PVUSB_DEVICE setup for worker in <https://gitlab.suse.de/openqa/salt-pillars-openqa/blob/master/openqa/workerconf.sls>

openqaworker13:3 worker was added for kernel bare metal testing, which is missing the above setups.

there are 2 options:

option1: add usb device(such as usb pen or keyboard) to server openqaipmi5.qa.suse.de, and add PVUSB_DEVICE setup to openqaworker13:3 worker, (need Nick's help)(poo#36961 for example)

option2: add one more worker_class(such as usb-64bit-ipmi) to below workers, and bounding pvusb testcases with this worker_class

openqaw1:1

openqaw1:2

openqaworker2:23

openqaworker2:24

openqaworker2:25

openqaworker2:26

Personally, I prefer option2 as 6 servers are enough for scheduling pvusb testcases, and we can't expect all servers in future to have the additional usb device ;)

@Santi, @Nick, we need your kindly suggestion :)

#3 - 2021-09-01 13:55 - okurz

- Priority changed from Normal to Low

This ticket was set to "Normal" priority but was not updated within 730 days which is 2 times the period of the SLO for "Normal" tickets (365 days) as described on <https://progress.opensuse.org/projects/openqatests/wiki/Wiki#SLOs-service-level-objectives> . The ticket will be set to the next lower priority of "Low".
