**Description**

**Observation**

openQA test in scenario opensuse-15.1-DVD-x86_64-update_Leap_42.2_gnome@64bit-2G fails in gnucash

In the video, it can be seen how the mouse pointer clicks on the "close window button", but it seems to be ignored.

**Reproducible**

Sporadically fails since Build 316.2

**Expected result**

Last good: 315.1 (or more recent)

**Further details**

Always latest result in this scenario: latest

**Related issues:**

- Status changed from In Progress to Feedback

Waiting for statistical investigation:

- 100 job runs: https://openqa.opensuse.org/tests/overview?build=sergio-gnucash-poo42443

#5 - 16/10/2018 06:43 am - okurz

https://openqa.opensuse.org/tests/773900#step/gnucash/24

#6 - 16/10/2018 06:43 am - okurz

I only see 10 jobs and they are all green

#7 - 20/10/2018 10:12 am - okurz
- Priority changed from Normal to High

@SLindoMansilla, I still see gnucash failing a lot on common openSUSE products on https://openqa.opensuse.org. We should act upon it. Do you have plans to do so or do you need support or should someone else take over?

#8 - 20/10/2018 08:19 pm - okurz

I looked in a bit more detail and I found that both https://bugzilla.opensuse.org/show_bug.cgi?id=1111443 and https://bugzilla.opensuse.org/show_bug.cgi?id=1112634 make tests fail. For the first (actually the duplicate bug https://bugzilla.opensuse.org/show_bug.cgi?id=1112616) I created workaround needles by masking the overlaying notice window. I wonder if we have other failures in gnucash or if the above two bugs explain all still present test failures.

#9 - 20/10/2018 08:33 pm - okurz

https://openqa.opensuse.org/tests/778267#step/gnucash/24 is gnucash after the close icon has been clicked but seemingly nothing happens. Neither does the gnucash window close nor is there a dialog to ask about if changes should be saved.

#10 - 29/10/2018 02:54 pm - SLindoMansilla
- Status changed from Feedback to Workable

Yes, I plan to work on this, I will continue with this after this gets resolved: https://progress.opensuse.org/issues/43040
okurz, since you already provided a fix for this on https://progress.opensuse.org/issues/43040, please verify if we can close this ticket.

Seems the last fixes were good, https://w3.nue.suse.com/~okurz/openqa_opensuse_org_status.html does not mention it, the original scenario shows no further gnucash problems, https://openqa.opensuse.org/tests/overview?version=15.1&amp;distri=opensuse&amp;groupid=50&amp;build=350.1 not and https://openqa.opensuse.org/tests/overview?distri=kubic&amp;distri=opensuse&amp;version=Tumbleweed&amp;build=20181118&amp;groupid=1 also not :)}
