

openQA Project - action #42452

openQA-in-openQA test fails in openqa_webui trying to access a TW snapshot repo on o3 that is already deleted and the test does not track the repo

2018-10-14 06:26 - okurz

Status:	Workable	Start date:	2018-10-14
Priority:	Low	Due date:

Category:	Feature requests	Estimated time:	0.00 hour
Target version:	future		
Difficulty:			
Description			
Observation			
openQA test in scenario openqa-Tumbleweed-dev-x86_64-openqa_install+publish@64bit-2G fails in openqa_webui			
Reproducible			
Fails since (at least) Build :TW.1772			
Expected result			
Last good: :TW.1771 (or more recent)			
Suggestions			
the repo of TW snapshot 20181011 is already deleted when trying to install packages from it. Maybe it is just as simple as specifying the repo in e.g. REPO_1=... so that openQA would track the job as dependant on the snapshot and not delete it that fast.			
Further details			
Always latest result in this scenario: latest

#2 - 2018-12-17 14:07 - SLindoMansilla

Setting added to test suite **openqa_install+publish**:

- REPO_1=http://opena.opensuse.org/assets/repo/openSUSE-Tumbleweed-oss-i586-x86_64-Snapshot%BUILD%

#3 - 2018-12-17 14:42 - okurz

I doubt this can work. Builds for the openQA-in-openQA tests are named like ":TW.1884" and not like 20181217

#4 - 2018-12-17 14:52 - SLindoMansilla

Right, setting removed...

There is a jenkins job triggering the tests, see <http://jenkins.qa.suse.de/view/openQA-in-openQA/>

https://gitlab.suse.de/openqa/scripts/blob/master/trigger-openqa_in_openqa is the trigger script where we could mention REPO_0 referencing the TW repo.

can you explain why you reject this? I guess the issue is still valid, is it not?

#11 - 2019-07-04 11:22 - okurz

discussed with [mgriessmeier](#) in person: Issue still valid, could reappear at any time when someone e.g. triggers a slightly older test job and in case the corresponding Tumbleweed repo was already deleted. The main reason we use a snapshot qcow image is to have a convenient image including gnome which AFAIK we don't have available from JeOS or anything. So I can think of three alternatives:

- Make sure the proper TW repos are tracked on o3
- Replace the repos with published ones
- use a different image that already has only published repos

#12 - 2019-08-26 09:30 - SLindoMansilla

- Subject changed from `[openqa][functional][u] openQA-in-openQA test fails in openqa_webui trying to access a TW snapshot repo on o3 that is already deleted and the test does not track the repo` to `[openqa][opensuse] openQA-in-openQA test fails in openqa_webui trying to access a TW snapshot repo on o3 that is already deleted and the test does not track the repo`

- Assignee set to okurz

We, u-team, prefer to not handle this extra product
