Description

Observation

openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-extra_tests_on_xfce@64bit fails in chrome

Reproducible

Fails since (at least) Build 20181015

Expected result

Last good: 20181012 (or more recent)

Further details

Always latest result in this scenario: latest
Since the last test runs, Google has releases Google Chrome 70 into their repos, which shows a new screen - this needs to be handled by the test case.

History

- Related to deleted (action #42605: [functional][y][autoyast][storage-ng] Test disk directly as PV)

#5 - 24/10/2018 08:05 pm - okurz
- Target version set to Milestone 21

#6 - 29/10/2018 03:08 pm - dimstar
- Status changed from New to Resolved

20/03/2020
https://openqa.opensuse.org/tests/781481#step/chrome/24 - this was sufficient to be handled by accepting the 'smart browse view' as the new 'main window' look, thus by creating a needle.
