**Description**

**Observation**

openQA test in scenario opensuse-15.1-DVD-x86_64-gnome@Laptop_64-2G fails in updates_packagekit_gpk

**Reproducible**

Fails since (at least) Build 319.3 (current job)

**Expected result**

Last good: 319.2 (or more recent)

**Further details**

Always latest result in this scenario: latest

**Related issues:**

**History**

#1 - 18/10/2018 06:59 pm - okurz
- Assignee set to ggardet_arm
- Priority changed from Normal to High

Hi Guillaume, sorry to say but I never trusted your check_screen 'blackscreen' change ;)

https://openqa.opensuse.org/tests/776757/file/autoinst-log.txt

shows that repeatedly the black screen is matched but no key press is done so we are endlessly stuck in it until finally in the post_fail_hook 'esc' is pressed. IMHO we should just revert your change because trying to match on a black screen does never seem to be a good idea. If the keypress of 'esc' is harmful then we could also look for an alternative. I would appreciate if you can handle this with high prio.

#2 - 18/10/2018 07:10 pm - ggardet_arm

Instead of pressing 'esc', we can just move the mouse, I guess.

The blackscreen matching is just a side effect of LXDE/XFCE screensaver which is just a blackscreen.

19/03/2020
This bug is still referenced in a failing openQA test: gnome@Laptop_64-2G
https://openqa.opensuse.org/tests/785763

#4 - 05/11/2018 11:03 am - ggardet_arm

https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6121 should fix the problem of blackscreen in GNOME, seen on Laptop test case.

#5 - 06/11/2018 06:34 am - okurz
- Status changed from New to Feedback

PR merged

#6 - 06/11/2018 08:53 am - okurz

https://openqa.opensuse.org/tests/788122 looks good but we should wait for more jobs for verification

#7 - 06/11/2018 06:36 pm - okurz

found one more failure on openSUSE Leap 15.1, triggered new test as https://openqa.opensuse.org/tests/788767, based on that I guess we can resolve the ticket.

#8 - 08/11/2018 01:00 pm - okurz
- Status changed from Feedback to Resolved

seems to be ok, https://openqa.opensuse.org/tests/788688
