Needle gnucash-main_window-xfce-leap15.1-20181106 created, retriggered as [https://openqa.opensuse.org/tests/788119#settings](https://openqa.opensuse.org/tests/788119#settings)

The behaviour is actually not different, only that Leap 15.1 still has gnucash 3.0, not 3.3. You might want to pick a new version of gnucash for Leap 15.1 as well.

ah, indeed, I forget that can be the reason, thanks.

not sure I should submitting 3.3 to Leap 15.1, basically maintainer should do that than release team.
