<b>Description</b>			
Kopano resources are shared store users with additional attributes "zarafaResourceType" and "zarafaResourceCapacity". Possible values are an integer number for the capacity and "equipment" or "room" for the type. Only resources of type "equipment" can be extended with a capacity value. It means that a resource exists X times.			

#### History

---

##### #1 - 2018-12-15 14:18 - flacco

- Status changed from New to In Progress

- % Done changed from 0 to 10

As an interim-solution there's a new commandline script called "mkkopres" to create and configure Kopano-ressources based on existing shared-stores.
