Description

**Observation**

openQA test in scenario sle-12-SP4-Desktop-DVD-x86_64-sdk+allpatterns@64bit fails in
addon_products_sle

**Reproducible**

Fails since (at least) Build 0379 (current job)

**Expected result**

Last good: 0378 (or more recent)

**Further details**

Always latest result in this scenario: latest

**History**

#1 - 2018-11-06 21:59 - okurz

- Status changed from New to Feedback
- Assignee set to okurz

I checked on osd, so the build 0362 of SDK is there for all four archs, retrigged failing desktop test with overridden parameters:

openqa_clone_job_osd --skip-chained-deps 2238608 BUILD_SDK=0362 ISO_1=SLE-12-SP4-SDK-DVD-x86_64-Build0362-Media1.iso
openqa_clone_job_osd --skip-chained-deps 2238604 BUILD_SDK=0362 ISO_1=SLE-12-SP4-SDK-DVD-x86_64-Build0362-Media1.iso

but there is also a migration job https://openqa.suse.de/tests/2238626, retrigged as https://openqa.suse.de/tests/2240200

#2 - 2018-11-20 20:13 - okurz

- Status changed from Feedback to Resolved
- Target version set to future

So fine for SLE12SP4 GM in the end even though not really anything fixed. Pretty sure this will come back as I assume we still do not really crosscheck matching versions of SDK and such. But maybe we will only see it once for SLE12SP5 GMC again but not for SLE15 so let's close then :)
