**Description**

**Observation**

openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-extra_tests_in_textmode@64bit fails in sssd

**Reproducible**

Fails since (at least) Build 20180714

**Expected result**

Last good: 20180714 (or more recent)

**Further details**

Always latest result in this scenario: latest

According to sssd 2.0.0 Release notes: https://docs.pagure.org/SSSD.sssd/users/relnotes/notes_2_0_0.html
- The Python API for managing users and groups in local domains (id_provider=local) was removed completely. The interface had been packaged as module called pysss.local

Then, we should remove the 'local' test for sssd for Tumbleweed.

**History**

#1 - 08/11/2018 09:10 pm - okurz
- Related to action #31246: [functional][u][bsc#1085145]test fails in sssd: use of deprecated python-pam added

#2 - 08/11/2018 09:11 pm - okurz
- Subject changed from test fails in sssd to [functional][u] test fails in sssd - needs to adapt to recent sssd update
- Target version set to Milestone 21

I see this related to https://bugzilla.suse.com/show_bug.cgi?id=1085145 and the referenced progress ticket where so far we have not found a new maintainer for the test module sssd which should be done as part of this ticket.

#3 - 09/11/2018 08:27 am - ggardet_arm

PR available: https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6170

05/04/2020
#4 - 09/11/2018 08:28 am - ggardet_arm
- Status changed from New to In Progress
- Assignee set to ggardet_arm

#5 - 12/11/2018 12:41 pm - ggardet_arm
- Status changed from In Progress to Resolved
- % Done changed from 0 to 100

PR merged and sssd test passed on TW aarch64: https://openqa.opensuse.org/tests/792280

#6 - 21/11/2018 11:03 am - okurz
- Related to action #44141: [functional][u][leap] test fails in sssd in junit test step "Start SSSD" added
