**Description**

RC1 is out, so we know what we will ship.

Get the KDE stuff from the KDE announcement, the GNOME stuff from the GNOME announcement, the kernel stuff from kernelnewbies.org and the H kernel archives etc and put the info on the [https://en.opensuse.org/openSUSE:Major_features](https://en.opensuse.org/openSUSE:Major_features) page!

Kick people in the marketing team to help with this.

Lots of ppl have been adding things. Reviewed, added some questions & send out a ping on this. Added some questions here and there, added information in other places. Need input on languages especially. Also, apps like inkscape, kdenlive, GIMP... Emailed the kde and gnome mailing lists asking for help.

#9 - 23/10/2013 07:46 pm - Anonymous
- Status changed from New to In Progress

Taken major packages from distrowatch.com, looked for updates and put in major_features. Some more to do.

Everything I could think off is on the Major_Features page, and I've gone over it a few times, polishing it as well. Mailed a 'last chance to add stuff' mail to the ML but I'm closing this issue. Next is finding top features (for the announcement) and moving content to the Features_13.1 page so we can start polishing it up with screenshots etc. (provided those are made...)
