Description

gnucash failed as missed characters on xterm

while executing extra_tests_on_gnome for ppc64le

between xterm started and expected password needle.

two exemples:

https://openqa.opensuse.org/tests/800968#step/gnucash/8
https://openqa.opensuse.org/tests/798469#step/gnucash/8

History

#1 - 20/11/2018 04:00 pm - michel_mno

may be same root cause, if those xterm password do not fail, then gnucash failed later on when "gnucash-tip-close" needle identified only one time while script expecting two times.

https://openqa.opensuse.org/tests/800931#step/gnucash/22

#2 - 20/11/2018 05:21 pm - okurz

- Subject changed from gnucash failed as missed characters on xterm (ppc64le) to [opensuse][functional][u] gnucash failed as missed characters on xterm (ppc64le)
- Category set to Bugs in existing tests
- Target version set to Milestone 23

#3 - 05/12/2018 06:22 am - okurz

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: extra_tests_on_gnome

https://openqa.opensuse.org/tests/805420

Move to new QSF-u PO after I moved to the "tools"-team. I mainly checked the subject line so in individual instances you might not agree to take it over completely into QSF-u. Feel free to discuss with me or reassign to me or someone else in this case. Thanks.
