Description
Time to get that feature page finished.
Remember, try to talk at least about the packages from http://distrowatch.com/table.php?distribution=suse!!

Also, integrate the screenshots. They should be created by now but more are always welcome as you'll note while trying to make the feature page pretty.

Note that the major features need to be on this page by the time you start working on the announcement, which is also during this time!

First steps are taken for Feature guide. Review and many screenshots still to be added but we're off to a good start. The page is shorter than last year, but that one was particularly insanely huge...

Went over the entire Feature page. Added screenshots to KDE, GNOME and general section and improved the text. It is done, except for the missing screenshots (about 5-6 of them).
