Description

Observation

openQA test in scenario opensuse-15.1-DVD-x86_64-extra_tests_in_textmode@64bit fails in sssd

looks similar to #43586 but ssd version in 15.1 is under 2.0

A recent test https://openqa.opensuse.org/tests/844196 shows that the junit based tests fail in the early step of “Start SSSD”.

Reproducible

Fails reproducibly

Expected result

Last good: Build 301.2

Also openSUSE Tumbleweed still works, e.g. see https://openqa.opensuse.org/tests/849606#step/sssd/18

Suggestions

- Make the test upload proper junit based logs on failure
- Investigate manually and compare to Tumbleweed or Leap 15.0
- Make sure the product problem is obvious with a reference to a proper bugreport or fix the test issue if it is any

Further details

Always latest result in this scenario: latest

#10 - 14/01/2019 09:59 am - okurz
- Priority changed from Normal to High
linked in currently failing tests. However, with this level of detail and no "last good" reference there will be not much motivation by many to pick it up.

03/04/2020
Shortly discussed in the QSF-u planning meeting. The according openSUSE Tumbleweed test case does not fail, e.g. see https://openqa.opensuse.org/tests/841664#step/sssd/44 so this seems to be a Leap specific problem.

@mlin7442 @lnussel Please take care to provide the necessary details for this to be workable.

Huh? As I wrote two months(!) ago the test doesn't provide any logs. The test is just bad. Fix the test and then you have the data to actually debug it.

Inussel wrote:

Huh? As I wrote two months(!) ago the test doesn't provide any logs. The test is just bad.

I was not asking for any logs but what I meant in #44141#note-10 . The original test author does not work for SUSE anymore, was not in QA, no one from our team has ever touched it. I don't think your comments are helpful but rather counter-productive.

I invested the time now and made the ticket "Workable".

checking this at first.

filed a bug and request for help from developer who might take a look at this problem and give comment or feedback so that we can go further with
solution or workaround, fix on sssd.

https://bugzilla.opensuse.org/show_bug.cgi?id=1125277

#19 - 13/02/2019 10:09 pm - okurz
- Status changed from Blocked to Workable

As discussed today in the planning meeting and over IRC: Please set the bug to “Blocker” and set the bug to the bugowner of the package based on what osc bugowner -e sssd tells you

#20 - 14/02/2019 08:57 am - zluo
- Status changed from Workable to Blocked

#21 - 18/02/2019 09:06 am - zluo
- Status changed from Blocked to Resolved

https://openqa.opensuse.org/tests/856186 shows that sssd works now.

#22 - 18/02/2019 09:30 am - okurz
- Status changed from Resolved to In Progress

Sorry but I do not see that. https://openqa.opensuse.org/tests/856186#step/sssd/20 still fails what looks like the same error?!? confused

#23 - 18/02/2019 10:30 am - zluo
- Status changed from In Progress to Feedback

will check this right now, thanks

#24 - 18/02/2019 12:20 pm - zluo
- Status changed from Feedback to Blocked

I overlooked this before:

new test run shows that we still have this issue and will check this for next build then https://openqa.opensuse.org/tests/857468#

#25 - 01/03/2019 09:12 am - lnussel

The test still fails on 15.1:
https://openqa.opensuse.org/tests/865134#step/sssd/20

If we can't fix this can we please get rid of the test then? I am tired of overriding it.

https://openqa.opensuse.org/tests/865134#step/sssd/20

If we can't fix this can we please get rid of the test then? I am tired of overriding it.

@Inussel You can set EXCLUDE_MODULES=sssd on the medium :)

#27 - 02/04/2019 07:34 am - mgriessmeier
- Target version changed from Milestone 23 to Milestone 24

moving to M24

#28 - 02/04/2019 07:58 am - SLindoMansilla
- Status changed from Blocked to Workable

Hi zluo, please, only change the status to blocked when we have a link to a valid bug or progress ticket.

#29 - 02/04/2019 01:21 pm - zluo
- Status changed from Workable to Blocked

Please see comment #18:

https://bugzilla.opensuse.org/show_bug.cgi?id=1125277

#30 - 09/04/2019 12:10 pm - zluo
- Status changed from Blocked to Rejected

https://openqa.opensuse.org/tests/801701#next_previous shows now stable and successful test runs.

So we can reject this for now.
